Prop. 65 DINP label requirement had been officially effective

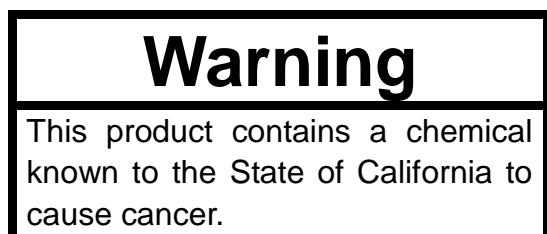

Earlier in 20 Dec. 2013, California OEHHA had added DINP to the Proposition list. There is a 12-month grace period from the date a substance is added to the Proposition 65 list to when the warning requirement would apply. From the date December 20, 2014, products containing DINP are required to provide warnings. Currently there isn't any court cases involving DINP exposures. Thus every products placing on the California markets should bear a warning label to guarantee a safe export.

As the DINP adding to the Proposition list, phthalates restricted by Proposition 65 have added up to 6 items from the previously 5 items. All of the 6 phthalates are:

Substances	CAS No.	Substances	CAS No.
DEHP	117-81-7	DIDP	68515-49-1
DBP	84-74-2	DnHP	84-75-3
BBP	85-68-7	DINP	28553-12-0

HCT Solutions:

DINP is a plasticizer that is widely used in cables, surface coatings and toys etc. Since currently there is not any court cases concerning about DINP, HCT suggest that all the enterprises required to test Proposition 65 phthalates add the DINP test. If DINP is not detected, products could export to California safely, if DINP detected, then enterprises will be needed to add a warning label on the packages of the products or on the retail store to clearly inform the customers what kind of effects it will bring, a typical sample for the warning label:

HCT could help enterprises to arrange Proposition 65 according to the products, help enterprises to export safely. Should there have any inquires, please call us.
