

POPs testing

November 2004, EU approved the STOCKHOLM CONVENTION ON PERSISTENT ORGANIC POLLUTANTS. From 20 May 2004, EU REGULATION (EC) No 850/2004 came into force, it bans the production, placing on the market and use of the listed substances. After that, EU published (EU) No 756/2010 and (EU) No 757/2010 in year 2010, (EU) No 519/2012 in year 2012, (EU) 2015/2030 in year 2015 and (EU) 2016/293 in year 2016 to revise the regulation (EC) No 850/2004.

25 June 2019, European Union published new regulation (EU) 2019/1021 on persistent organic pollutants (POPs), replaced previous (EC) No 850/2004. This new regulation will be effective on 15 July 2019.

POPs is short for Persistent Organic Pollutants. The persistent organic pollutants are the natural or artificially synthesized organic pollutants that possess toxic properties, resist degradation, bioaccumulate and are transported, through air, water and migratory species, across international boundaries and deposited far from their place of release, where they accumulate in terrestrial and aquatic ecosystems.

HCT currently has the capability and detailed testing scheme for POPS TESTING, could help enterprises to arrange the POPs test and issue the test reports in comply with the (EU) 2019/1021 requirements, help enterprises to define whether the products are comply with (EU) 2019/1021. For further POPs test enquiry, please contact us.

Where such a derogation concerns production or use in an installation within the scope of Directive 2008/1/EC of the European Parliament and of the Council (4), the relevant best available techniques for the prevention and minimisation of emissions of PFOS described in the information published by the Commission pursuant to Article 17(2), second subparagraph, of Directive 2008/1/EC shall apply. As soon as new information on details of uses and safer alternative substances or technologies becomes available, the Commission shall review the derogation in the second subparagraph so that: <ul style="list-style-type: none"> (a) the uses of PFOS will be phased out as soon as the use of safer alternatives is technically and economically feasible; (b) a derogation can only be continued for essential uses for which safer alternatives do not exist and where the efforts undertaken to find safer alternatives have been reported on; (c) releases of PFOS into the environment have been minimised by applying best available techniques. 5. Once standards are adopted by the European Committee for Standardisation (CEN) they shall be used as the analytical test methods for demonstrating the conformity of substances, mixtures and articles to points 1 and 2.
