ECHA Withdraws Two SVHC Intention Substances

On January 15, 2025, the European Chemicals Agency (ECHA) withdrew two SVHC intention substances: barium chromate and 1,1,1,3,5,5,5-heptamethyltrisiloxane. As a result, excluding these withdrawn substances, the latest list of SVHC intention substances now includes five items.

The withdrawn substances are as follows:

No.	Substance name	EC No.	CAS No.	Reason	Use	Published	Withdrawn
1	1,1,1,3,5,5,5-heptamethyltrisiloxane	217-496-1	1873-88-7	vPvB (Article 57e)	Used as a reduction catalyst in organic synthesis.	March 13, 2023	January 15, 2025
2	Barium chromate	233-660-5	10294-40-3	Carcinogenic (Article 57a)	Explosives, coating products, adhesives and sealants, etc.	August 6, 2024	

The latest list of intended substances is as follows:

No	Substance name	EC No.	CAS No.	Reason	Use	Remarks
1	Hexamethyldisiloxane	203-492-7	107-46-0	PBT (Article 57d)	Used in cosmetics and personal care products, washing and cleaning products, paint products.	It is expected that a public consultation will be launched in February 2025.
2	Dodecamethylpentasiloxane	205-492-2	141-63-9	vPvB (Article 57e)	Used in cosmetics and personal care products, washing and cleaning products.	
3	Decamethyltetrasiloxane	205-491-7	141-62-8	vPvB (Article 57e)	Used in cosmetics and personal care products, washing and cleaning products.	
4	1,1,1,3,5,5,5-heptamethyl-3-[(trimethylsilyl)oxy]trisiloxane	241-867-7	17928-28-8	vPvB (Article 57e)	Used in cosmetics, personal care products and perfume.	

5	tetra(sodium/potassium) 7-[(E)-{2-acetamidido-4-[(E)-(4-[[4-chloro-6-({2-[(4-fluoro-6-[[4-(vinylsulfonyl)phenyl]amino)-1,3,5-triazine-2-yl]amino]propyl]amino)-1,3,5-triazine-2-yl]amino]-5-sulfonato-1-naphthyl)diazenyl]-5-methoxyphenyl]diazenyl]-1,3,6-naphthalenetrisulfonate; Reactive Brown 51	466-490-7	/	Toxic for reproduction (Article 57c)	Textile treatment products and dyes.
---	---	-----------	---	--------------------------------------	--------------------------------------

According to REACH, if SVHC is contained in article in a concentration that greater than 0.1% (w/w), downstream importers shall be notified with such information for communication and also provided with certifications. However, if SVHC is contained in article in a concentration that greater than 0.1% (w/w) and the volume for export is more than 1 tonne, notification of such information to ECHA is necessary. According to the WFD requirements, starting from January 5, 2021, if the SVHC content in an article is greater than 0.1%, the company needs to make a SCIP notification.

HCT SOLUTION:

HCT possessing wide testing fields and convenient service channels, can help enterprises assess regulated specific chemical substances in products. Thus enterprises can successfully import products to designed target countries.
