## ECHA has withdrawn one SVHC intention substance- Hexamethyldisiloxane

Recently, the European Chemicals Agency (ECHA) withdrew one SVHC intended substance, which is hexamethyldisiloxane. So far, there are two SVHC intention substances.

**Details of the withdrawn intended substances are as follows:**

No.	Substance name	EC No.	CAS No.	Reason	Use
1	Hexamethyldisiloxane	203-492-7	107-46-0	PBT (Article 57d)	Used in cosmetics and personal care products, washing and cleaning products, paint products.

**The latest list of intended substances is as follows:**

No.	Substance name	EC No.	CAS No.	Reason	Use	Estimated time for public consultation
1	N-hexane	203-777-6	110-54-3	Equivalent level of concern having probable serious effects to human health (Article 57(f) - human health)	Used in polishes and waxes, adhesives and sealants, antifreeze products, biocides, coating products, textile treatment products and dyes, and cosmetics and personal care products, etc.	August 4, 2025
2	Dodecathylpentasiloxane	205-492-2	141-63-9	vPvB (Article 57e)	Used in cosmetics and personal care products, washing and cleaning products.	February 2, 2026

According to REACH, if SVHC is contained in article in a concentration that greater than 0.1% (w/w), downstream importers shall be notified with such information for communication and also provided with certifications. However, if SVHC is contained in article in a concentration that greater than 0.1% (w/w) and the volume for export is more than 1 tonne, notification of such information to ECHA is necessary. According to the WFD requirements, starting from January 5, 2021, if the SVHC content in an article is greater than 0.1%, the company needs to make a SCIP notification.

### HCT SOLUTION:

HCT possessing wide testing fields and convenient service channels, can help enterprises assess regulated specific chemical substances in products. Thus enterprises can successfully import products to designed target countries.
