Official update: REACH SVHC added DBDPE

On November 5, 2025, ECHA officially added DBDPE into the SVHC list. Up to now the SVHC list contains 251 officially substances. Details of the newly added substance is as follows:

No.	Substance name	EC No.	CAS No.	Reason	Use
251	1,1'-(ethane-1,2-diyl)bis[pentabromobenzene]	284-366-9	84852-53-9	vPvB (Article 57e)	Used in adhesives and sealants, coating products, polymers, washing and cleaning products as well as cosmetics and personal care products.

In addition, there are 3 substances under review and 1 substance pending confirmation under REACH SVHC. The substance information is updated as follows:

No.	Substance name	EC No.	CAS No.	Reason	Potential uses	Category
1	4,4'-methylenedi phenol	210-658-2	620-92-8	Toxic for reproduction (Article 57c)	It is mainly used in the production of epoxy resin, polycarbonate resin and polyester resin, and can also be used as flame retardant, antioxidant and surfactant.	Review substance
2	4,4'-[2,2,2-trifluoro-1-(trifluoromethyl)ethylidene]diphenol and its salts	-	-	Toxic for reproduction (Article 57c)	It is mainly used as a monomer to synthesize fluorine-containing polymers, and can also be used to synthesize dyes, photosensitive materials, and optical brighteners.	Review substance
3	N-hexane	203-777-6	110-54-3	Equivalent level of concern having probable serious effects to human health (Article	Used in polishes and waxes, adhesives and sealants, antifreeze products, biocides, coating products, textile treatment products and dyes, and cosmetics and personal care products, etc.	Review substance

				57(f) - human health)		
4	resorcinol	203-585-2	108-46-3	Endocrine disrupting properties (Article 57(f) - human health)	Used in dye industry, plastic industry, medicine, rubber, etc.	Proposed additional substances

According to REACH, if SVHC is contained in article in a concentration that greater than 0.1% (w/w), downstream importers shall be notified with such information for communication and also provided with certifications. However, if SVHC is contained in article in a concentration that greater than 0.1% (w/w) and the volume for export is more than 1 tonne, notification of such information to ECHA is necessary. According to the WFD requirements, starting from January 5, 2021, if the SVHC content in an article is greater than 0.1%, the company needs to make a SCIP notification.

HCT SOLUTION:

HCT possessing wide testing fields and convenient service channels, can help enterprises assess regulated specific chemical substances in products. Thus enterprises can successfully import products to designed target countries.
