

General Information

HCT-202101-01

2 New Substances of the 24th Batch are Officially Added into SVHCs List

Until 19 January 2021 SVHCs are determined to be updated to 211 items

Helsinki, 19 January 2021 –ECHA officially added two new substances in the 24th batch to the list of substances of SVHC list.

The legal obligations that companies may have resulting from the inclusion of substances in the Candidate List may apply to the listed substances on their own, in mixtures or in articles. Producers and importers of articles containing any of the 211 substances included in the Candidate List on 19 January 2021 have six months to notify ECHA if the SVHC is present in articles in amounts that total more than one tonne per producer or importer per year and above a concentration of 0.1% weight by weight. There are exemptions from the notification obligation if the substance is already registered for the use or when exposure can be excluded.

Candidate List updated with two chemicals that are toxic for reproduction

ECHA/NR/21/05

The Candidate List of substances of very high concern now contains 211 chemicals that may harm people or the environment.

Helsinki, 19 January 2021 – The two substances are used in products, such as inks or toners and to produce plastics and rubber tyres. They were added to the Candidate List as they are toxic for reproduction and therefore, may adversely affect sexual function and fertility, and cause developmental toxicity in offspring.

Companies must follow their legal obligations and ensure the safe use of these chemicals. From January 2021 onwards, they also have to notify ECHA under the Waste Framework Directive if their products contain substances of very high concern. This notification is submitted to ECHA's SCIP database and the information will later be published on the Agency's website.

About REACH

REACH REGULATION concerning the Registration, Evaluation, Authorization and Restriction of Chemicals, shorten as REACH, is chemical regulatory system founded by EU, which was officially executive from June 1st, 2007.

REACH is a regulation that should ensure a high level of protection of human health and the environment as well as the free movement of substances, on their own, in preparations and in articles, while enhancing competitiveness and innovation.

Substances included in the Candidate List for authorisation until 19 January 2021 and their SVHC properties:

Batch	Substance name	EC.NO	CAS.NO	SVHC property	Potential uses
The	Bis(2-(2-methoxyethoxy)ethyl)eth	205-594-7	143-24-8	Toxic for	It can be used as a solvent for
24th	er			reproduction	alkaline gold hydride. It can be
batch				(Article 57 (c))	used to purify synthetic gas,
					natural gas, acetylene and other
					gases.
					Also used in the production of
					inks, toners, plastics and rubber
					tires.
	Dioctyltin dilaurate, stannane,	_	—	Toxic for	It can be used as stabilizer and
	dioctyl-, bis(coco acyloxy) derivs.,			reproduction	catalyst for plastics, textiles and
	and any other stannane, dioctyl-,			(Article 57 (c))	leather.
	bis(fatty acyloxy) derivs. wherein				
	C12 is the predominant carbon				
	number of the fatty acyloxy moiety				
The	1-vinylimidazole	214-012-0	1072-63-5	Toxic for	Hardener for resin materials,
23st				reproduction	photochemical reagents, cores
batch				(Article 57c)	of resin inclusions, also used in
					the petroleum industry and as
					polymers
	2-methylimidazole	211-765-7	693-98-1	Toxic for	It is used in the production of
				reproduction	pharmaceutical intermediates
				(Article 57c)	such as metronidazole, and is
					used as a curing agent for epoxy
					resins.
	Butyl 4-hydroxybenzoate	202-318-7	94-26-8	Endocrine	It is used for preservatives in
				disrupting	daily chemical industry, medicine
				properties (Article	and food industry, as well as
				57(f) – human	antiseptics for grease, starch
				health)	paste, rubber solution, perfume,
					film, etc.

	Orange lead (Lead tetroxide)	215-235-6	1314-41-6	Toxic for reproduction (Article 57 c)	Used in production of battery, glass, pottery, ceramic, and used as a protective surface layer of the anti-rust pigment and iron, as well as dyes and other synthetic organic oxidant
	Lead bis(tetrafluoroborate)	237-486-0	13814-96-5	Toxic for reproduction (Article 57 c)	Used for plating of terne metal in printed circuit and lead low-temperature welding. Also used as an analytical reagent; can be used as the circuit boards, tin lead alloy plating in electroplating
	Trilead bis(carbonate)dihydroxide	215-290-6	1319-46-6	Toxic for reproduction (Article 57 c)	Mainly used in paint, especially suitable for manufacturing antirust paint and outdoor paint
The	Lead titanium trioxide	235-038-9	12060-00-3	Toxic for reproduction (Article 57 c)	Used for manufacturing complex electronic ceramics such as the BaTiO3-PbTiO3 and PbZrO3-PbTiO3, to improve the electrical properties of ceramics. Also used as a pigment for paint.
8th batch	Lead titanium zirconium oxide	235-727-4	12626-81-2	Toxic for reproduction (Article 57 c)	Used for manufacturing complex electronic ceramics to improve the electrical properties of ceramics. Also used as a pigment for paint
	Silicic acid, lead salt	234-363-3	11120-22-2	Toxic for reproduction (Article 57 c)	Mainly used in the manufacture of optical glass, CRT, optical fiber, household utensils and low melting point solder
	Silicic acid (H2Si2O5), barium salt (1:1), lead-doped [with lead (Pb) content above the applicable generic concentration limit for 'toxicity for reproduction' Repr. 1A (CLP) or category 1 (DSD); the substance is a member of the group entry of lead compounds, with index number 082-001-00-6 in Regulation (EC) No 1272/2008]	272-271-5	68784-75-8	Toxic for reproduction (Article 57 c)	Used for manufacturing complex electronic ceramics to improve the electrical properties of ceramics.
	1-bromopropane (n-propyl bromide)	203-445-0	106-94-5	Toxic for reproduction (Article 57 c)	Used for the synthesis of pharmaceuticals, pesticides, dyes, spices, etc

Batch	Substance name	EC.NO	CAS.NO	SVHC property	Potential uses
	Methyloxirane (Propylene oxide)	200-879-2	75-56-9	Carcinogenic (Article 57a); Mutagenic (Article 57b)	Used as important basic organic chemical synthesis of raw materials, mainly used for the production of polyether, propylene glycol. Propylene oxide derivatives are widely used in the automotive, construction, food, tobacco, pharmaceutical and cosmetics industries
	1,2-Benzenedicarboxylic acid, dipentylester, branched and linear	284-032-2	84777-06-0	Toxic for reproduction (Article 57 c)	The substance can be used as plasticizer of cellulose resin, polystyrene, and chlorinated rubber to characterize film products with well elasticity, weather ability and tensile strength
	Diisopentylphthalate (DIPP)	210-088-4	605-50-5	Toxic for reproduction (Article 57 c)	The substance can be used as plasticizer of cellulose resin, polystyrene, and chlorinated rubber to characterize film products with well elasticity, weather ability and tensile strength
	N-pentyl-isopentylphthalate	-	776297-69-9	Toxic for reproduction (Article 57 c)	The substance can be used as plasticizer of cellulose resin, polystyrene, and chlorinated rubber to characterize film products with well elasticity, weather ability and tensile strength
The 8th batch	1,2-diethoxyethane	211-076-1	629-14-1	Toxic for reproduction (Article 57 c)	Used as acrylic resin, methacrylic resin, epoxy resin and a nitro group, and a solvent such as ethyl cellulose, but also as extraction agents in pharmaceutical industry; lubricating oil additives; paint remover; paint coatings; solvents, etc.
	Acetic acid, lead salt, basic	257-175-3	51404-69-4	Toxic for reproduction (Article 57 c)	As analytical reagent, also used in the pharmaceutical industry
	Lead oxide sulfate	234-853-7	12036-76-9	Toxic for reproduction (Article 57 c)	Use as white pigment and heat stabilizer in plastics.
	[Phthalato(2-)]dioxotrilead	273-688-5	69011-06-9	Toxic for reproduction (Article 57 c)	Used as high-temperature electrical insulation materials, foam products and rolled products
	Dioxobis(stearato)trilead	235-702-8	12578-12-0	Toxic for reproduction (Article 57 c)	Used for manufacturing complex electronic ceramics to improve the electrical properties of ceramics.
	Fatty acids, C16-18, lead salts	292-966-7	91031-62-8	Toxic for reproduction (Article 57 c)	Used in manufacture of paint, printing ink
	Lead cynamidate	244-073-9	20837-86-9	Toxic for reproduction (Article 57 c)	Mainly used in plating (both electrolytic and electroless) processes for electronic components (such as printed circuit boards).

Batch	Substance name	EC.NO	CAS.NO	SVHC property	Potential uses
	Lead dinitrate	233-245-9	10099-74-8	Toxic for reproduction (Article 57 c)	Milk yellow pigment. Used as coal agent In printing and dyeing industry. Used in production of other lead salts, lead dioxide and convergence agent. Tanning agent; Sensitizer. Used as flotation agents in mining industry. Oxidant, as well as the analytical chemistry of chemical reagents
	Pentalead tetraoxide sulphate	235-067-7	12065-90-6	Toxic for reproduction (Article 57 c)	Used for manufacturing complex electronic ceramics to improve the electrical properties of ceramics.
	Pyrochlore, antimony lead yellow	232-382-1	8012-00-8	Toxic for reproduction (Article 57 c)	Used in manufacture of coloration of paint, printing ink, rubbers and plastic products.
The 8th batch	Sulfurous acid, lead salt, dibasic	263-467-1	62229-08-7	Toxic for reproduction (Article 57 c)	Used in manufacture of storage batteries, glasses, potteries and ceramic, also used as protective surface of rust resisting pigments and iron, and a oxidant of dyes and other organic compounds.
Datch	Tetraethyllead	201-075-4	78-00-2	Toxic for reproduction (Article 57 c)	Used for gasoline seismic additives to improve the octane number, and for organic synthesis
	Tetralead trioxide sulphate	235-380-9	12202-17-4	Toxic for reproduction (Article 57 c)	Used as a PVC stabilizer; having harmonized effects used with dibasic lead phosphate.
	Trilead dioxide phosphonate	235-252-2	12141-20-7	Toxic for reproduction (Article 57 c)	Used for manufacturing complex electronic ceramics to improve the electrical properties of ceramics.
	Furan	203-727-3	110-00-9	Carcinogenic (Article 57a)	For organic synthesis or as a solvent. Used in the production of nitrofurazone. Furan is a nice rich electrophilic aromatic heterocyclic
	Diethyl sulphate	200-589-6	64-67-5	Carcinogenic (Article 57a); Mutagenic (Article 57b)	Used as food flavor, perfume fragrance and soap flavor; for phenols Ethoxylation; It is a very important plant mutagen used to cultivate new varieties, fast and efficient; used as an excellent organic solvent and extractant; also

intermediates used to synthetic pharmaceuticals, paints, dyes, etc

atch	Substance name	EC.NO	CAS.NO	SVHC property	Potential uses
	Dimethyl sulphate	201-058-1	77-78-1	Carcinogenic (Article 57a)	Used in the manufacture of dyes and methylating agents of amines and alcohols; Analytical reagent. Organic synthesis; Methylation reagent; Solvents. Its vapor is highly toxic, was used as a poison gas of war. For the determination of the reagent of the coal tars; used in organic synthesis as a methyl substituted agent
	3-ethyl-2-methyl-2-(3-meth ylbutyl)-1,3-oxazolidine	421-150-7	143860-04-2	Toxic for reproduction (Article 57 c)	Used as a styrene polymerization inhibitors and pesticide intermediates
	Dinoseb (6-sec-butyl-2,4-dinitrophen ol)	201-861-7	88-85-7	Toxic for reproduction (Article 57 c)	Used as a styrene polymerization inhibitors and pesticide intermediates
	4,4'-methylenedi-o-toluidine	212-658-8	838-88-0	Carcinogenic (Article 57a)	used for the high-temperature varnish, capacitor films, printed circuit board and aviation parts
The 8th	4,4'-oxydianiline and its salts	202-977-0	101-80-4	Carcinogenic (Article 57a); Mutagenic (Article 57b)	Used in production of heat stability plastics and as cross-linking agent.
batch	4-aminoazobenzene	200-453-6	60-09-3	Carcinogenic (Article 57a)	Used as dye intermediates. Used in the synthesis of azo dyes, disperse dyes, oxazine dyes; also used in making paints and pigments, as well as alcohol-soluble yellow and pH indicator
	4-methyl-m-phenylenediam ine (toluene-2,4-diamine)	202-453-1	95-80-7	Carcinogenic (Article 57a)	TDI, sulfur dyes, basic dyes, disperse dyes, pharmaceutical intermediates and other organic synthesis
	6-methoxy-m-toluidine (p-cresidine)	204-419-1	120-71-8	Carcinogenic (Article 57a)	Suitable for direct, disperse, reactive dyes Synthesis
	Biphenyl-4-ylamine	202-177-1	92-67-1	Carcinogenic (Article 57a)	Dye and pesticide intermediates; also used for manufacturing scintillatort paraterphenyl; manufacturing dyes; Cancer Research; organic synthesis;
	o-aminoazotoluene [(4-o-tolylazo-o-toluidine])	202-591-2	97-56-3	Carcinogenic (Article 57a)	Used to make dyes and drugs, and used as a maroon base GBC (Fast Gamet GBC base, formerly known as purple caramel base G or GC)

o-toluidine	202-429-0	95-53-4	Carcinogenic (Article 57a)	Use as dye intermediates, organic synthesis and synthesis of saccharin
N-methylacetamide	201-182-6	79-16-3	Toxic for reproduction (Article 57 c)	pharmaceutical industry, catalyst, deacidifying agent

Batch	Substance name	EC.NO	CAS.NO	SVHC property	Potential uses
	1,2-bis(2-methoxyetho xy)ethane (TEGDME; triglyme)	203-977-3	112-49-2	Toxic for reproduction (Article 57c)	Mainly used as a solvent or as a processing aid in the manufacture and formulation of industrial chemicals. Minor use in brake fluids and repair of motor vehicles.
	1,2-dimethoxyethane; ethylene glycol dimethyl ether (EGDME)	203-794-9	110-71-4	Toxic for reproduction (Article 57c)	Mainly used as a solvent or as a processing aid in the manufacture and formulation of industrial chemicals, including use as an electrolyte solvent in lithium batteries.
	Diboron trioxide	215-125-8	1303-86-2	Toxic for reproduction (Article 57c)	Used in a multitude of applications, e.g., in glass and glass fibres, frits, ceramics, flame retardants, catalysts, industrial fluids, metallurgy, adhesives, inks/paints, film developers solutions, detergents and cleaners, biocides and insecticides.
The	Formamide	200-842-0	75-12-7	Toxic for reproduction (Article 57c)	Mainly used as an intermediate. Minor uses as solvent, as reagent chemical (in the pharmaceutical industry) and as laboratory chemical. The substance seems further to be used in the agrochemical industry and as a plasticiser.
7th batch	Lead(II) bis(methanesulfonate)	401-750-5	17570-76- 2	Toxic for reproduction (Article 57c)	Mainly used in plating (both electrolytic and electroless) processes for electronic components (such as printed circuit boards).
	TGIC (1,3,5-tris(oxiranylmet hyl)-1,3,5-triazine-2,4, 6(1H,3H,5H)-trione)	219-514-3	2451-62-9	Mutagenic (Article 57b)	Mainly used as a hardener in resins and coatings; also used in inks for the printed circuit board industry, electrical insulation material, resin moulding systems, laminated sheeting, silk screen printing coatings, tools, adhesives, lining materials and stabilisers for plastics.
	β-TGIC (1,3,5-tris[(2S and 2R)-2,3-epoxypropyl]- 1,3,5-triazine-2,4,6-(1 H,3H,5H)-trione)	423-400-0	59653-74- 6	Mutagenic (Article 57b)	Mainly used as a hardener in resins and coatings; also used in inks for the printed circuit board industry, electrical insulation material, resin moulding systems, laminated sheeting, silk screen printing coatings, tools, adhesives, lining materials and stabilisers for plastics.
	4,4'-bis(dimethylamino)benzophenone (Michler's ketone)	202-027-5	90-94-8	Art. 57 (a), carcinogenic	Intermediate in the manufacture of triphenylmethane dyes and other substances. Further potential uses include as additive (photosensitiser) in dyes and pigments, in dry film products, as a process chemical in the production of electronic circuit boards, in research and development applications.

	[4-[4,4'-bis(dimethylam ino) benzhydrylidene]cyclo hexa-2,5-dien-1-yliden e]dimethylammonium chloride (C.I. Basic Violet 3)	208-953-6	548-62-9	Art. 57 (a), carcinogenic	Used mainly for paper colouring and inks supplied in printer cartridges and ball pens. Further uses include staining of dried plants, marker for increasing the visibility of liquids, staining in microbial and clinical laboratories.
The 7th batch	[4-[[4-anilino-1-naphth yl][4-(dimethylamino)p henyl]methylene]cyclo hexa-2,5-dien-1-yliden e] dimethylammonium chloride (C.I. Basic Blue 26)	219-943-6	2580-56-5	Art. 57 (a), carcinogenic	Used in the production of inks, cleaners, and coatings, as well as for dyeing of paper, packaging, textiles, plastic products, and other types of articles. It is also used in diagnostic and analytical applications.
	α,α-Bis[4-(dimethylami no)phenyl]-4 (phenylamino)naphtha lene-1-methanol (C.I. Solvent Blue 4)	229-851-8	6786-83-0	Art. 57 (a), carcinogenic	Mainly used in the production of printing and writing inks, for dyeing of paper and in mixtures such as windscreen washing agents.
	4,4'-bis(dimethylamino)-4"-(methylamino)trityl alcohol	209-218-2	561-41-1	Art. 57 (a), carcinogenic	Used in the production of writing inks and potentially in the production of other inks, as well as for dyeing of a variety of materials.

HONGCAI TESTING

	Dichromium tris(chromate)	246-356-2	24613-89-6	Art. 57 (a), carcinogenic	used in mixtures to treat metal surfaces in the aeronautic/aerospace, steel and aluminium coating sectors
	Potassium hydroxyoctaoxodizincatedichro mate	234-329-8	11103-86-9	Art. 57 (a), carcinogenic	used in the aeronautic/aerospace, steel, aluminium coil and vehicle coating sectors
	Pentazinc chromate octahydroxide	256-418-0	49663-84-5	Art. 57 (a), carcinogenic	used in the vehicle coating and aeronautic/aerospace sectors
	Zirconia Aluminosilicate Refractory Ceramic Fibres	_	_	Art. 57 (a), carcinogenic	used for high-temperature insulation in industrial applications and in fire protection
The 6th batch	Aluminosilicate Refractory Ceramic Fibres	_	-	Art. 57 (a), carcinogenic	used for high-temperature insulation in industrial applications and in fire protection
batom	Formaldehyde, oligomeric reaction products with aniline	500-036-1	25214-70-4	Art. 57 (a), carcinogenic	used to manufacture other substances
	Bis(2-methoxyethyl) phthalate	204-212-6	117-82-8	Toxic for reproduction (Article 57c)	little presumed use as ECHA has not received any registration for the substance
	2-Methoxyaniline; o-Anisidine	201-963-1	90-04-0	Art. 57 (a), carcinogenic	used in the vehicle coating and aeronautic/aerospace sectors
	4-(1,1,3,3-tetramethylbutyl)phe nol	205-426-2	140-66-9	Equivalent level of concern having probable serious effects to the environment (article 57 f)	mainly used to manufacture polymer preparations and ethoxylates
	1,2-dichloroethane	203-458-1	107-06-2	Art. 57 (a), carcinogenic	used to manufacture other substances
	Bis(2-methoxyethyl) ether	203-924-4	111-96-6	Toxic for reproduction (Article 57c)	used to manufacture dyes for tattooing and colouring paper, polymers and aluminium foil

HONGCAI TESTING

Batch	Substance name	EC.NO	CAS.NO	SVHC property	Potential uses
	Arsenic acid	231-901-9	7778-39-4	Art. 57 (a), carcinogenic	Arsenic acid is mainly used to remove gas bubbles from ceramic glass melt (fining agent) and in the production of laminated printed circuit boards. To lesser extent the substance is also used in the manufacture of semiconductors and as laboratory agent.
	Calcium arsenate	231-904-5	7778-44-1	Art. 57 (a), carcinogenic	present in complex raw materials imported to manufacture copper, lead and a range of precious metals.
	Trilead diarsenate	222-979-5	3687-31-8	Carcinogenic and toxic for reproduction (articles 57 a and 57 c)	present in complex raw materials imported to manufacture copper, lead and a range of precious metals
The	N,N-dimethylacetamide (DMAC)	204-826-4	127-19-5	Carcinogenic (article 57 a)	used as solvent and in industrial coatings, polyimide films, paint strippers and ink removers
6th batch	2,2'-dichloro-4,4'-methylenedia niline (MOCA)	202-918-9	101-14-4	Art. 57 (a), carcinogenic	mainly used as curing agent in resins and to produce polymer articles
	Phenolphthalein	201-004-7	77-09-8	Art. 57 (a), carcinogenic	used as laboratory agent (in pH indicator solutions), to produce pH-indicator paper and in medicinal products
	Lead diazide, Lead azide	236-542-1	13424-46-9	Toxic for reproduction (Article 57c)	Lead diazide is mainly used as initiator or booster in detonators for both civilian and military uses and as initiator in pyrotechnic devices.
	Lead styphnate	239-290-0	15245-44-0	Toxic for reproduction (Article 57c)	Lead styphnate is mainly used as a primer for small calibre and rifle ammunition. Other common uses are in ammunition pyrotechnics, powder actuated devices and detonators for civilian use.
	Lead dipicrate	229-335-2	6477-64-1	Art. 57 (c), toxic for reproduction	No registration for lead dipicrate has been submitted to ECHA. The substance is an explosive like lead diazide and lead styphnate. It may be used in low amounts in detonator mixtures together with the two other mentioned lead compounds.

HONGCAI TESTINU

Batch	Substance name	EC.NO	CAS.NO	SVHC property	Potential uses
	2-ethoxyethyl acetate	203-839-2	111-15-9	Art. 57 (c), toxic for reproduction	Main uses in the past were as solvent in coatings and in the chemical industry, but also as intermediate in the manufacture of cyanoacrylate adhesives.
	Strontium chromate	232-142-6	7789-06-2	Art. 57 (a), carcinogenic	Strontium chromate is mainly used as corrosion inhibitor in coating mixtures used in the eronautic/aerospace sector, in the coil coating sector of steel and aluminium and in the vehicle coating sector.
	1,2-Benzenedicar boxylic acid, di-C7-11-branched and linear alkyl esters (DHNUP)	271-084-6	68515-42-4	Art. 57 (c), toxic for reproduction	Main uses in the past were as plasticizer in PVC, foam, adhesives and coatings.
The 5th batch	Hydrazine	206-114-9	7803-57-8 302-01-2	Art. 57 (a), carcinogenic	Hydrazine is mainly used as intermediate in the manufacture of hydrazine derivatives, as a monomer in polymerisations, as a corrosion inhibitor in water treatment and for metal reduction and refining of chemicals. It is also used as a propellant for aerospace vehicles and as fuel in military (emergency) power units.
	1-methyl-2-pyrrolidone	212-828-1	872-50-4	Art. 57 (c), toxic for reproduction	1-methyl-2-pyrrolidone is mainly used as solvent in coatings, cleaning products, for electronic equipment manufacture, as well as in semiconductor industry, petrochemical processing, pharmaceuticals and agrochemicals.
	1,2,3-trichloropropane	202-486-1	96-18-4	Art. 57 (a) & (c), carcinogenic & toxic for reproduction	1,2,3-trichloropropane is mainly used as intermediate in the manufacture of chlorinated solvents and agricultural products. It is also used as monomer. In the past 1,2,3-trichloropropane was used as solvent, paint and varnish remover and as degreasing agent.
	1,2-Benzenedicarboxylic acid, di-C6-8-branched alkyl esters, C7-rich (DIHP)	276-158-1	71888-89-6	Art. 57 (c), toxic for reproduction	Main uses in the past were as plasticiser in PVC and in sealants, coatings and potentially printing inks.

HONGCAI TESTING

	Cobalt(II) sulphate	233-334-2	10124-43-3	Art. 57 (a) & (c), carcinogenic & toxic for reproduction	Mainly used in the production of other chemicals. Further applications may include manufacture of catalysts and driers, surface treatments (such as electroplating), corrosion prevention, production of pigments, decolourising (in glass, pottery), batteries, animal food supplement, soil fertilizer, and others.
	Cobalt(II) dinitrate	233-402-1	10141-05-6	Art. 57 (a) & (c), carcinogenic & toxic for reproduction	Mainly used in the production of other chemicals and the manufacture of catalysts. Further applications may include surface treatment and batteries.
The	Cobalt(II) carbonate	208-169-4	513-79-1	Art. 57 (a) & (c), carcinogenic & toxic for reproduction	Mainly used in the manufacture of catalysts. Minor uses may include feed additive, production of other chemicals, production of pigments, and adhesion (in ground coat frit).
4th batch	Cobalt(II) diacetate	200-755-8	71-48-7	Art. 57 (a) & (c), carcinogenic & toxic for reproduction	Mainly used in the manufacture of catalysts. Minor uses may include production of other chemicals, surface treatment, alloys, and production of pigments, dyes, rubber adhesion, and feed additive.
	2-Methoxyethanol	203-713-7	109-86-4	Toxic for reproduction (article 57c)	Mainly used as solvent, chemical intermediate and additive for fuels.
	2-Ethoxyethanol	203-804-1	110-80-5	Toxic for reproduction (article 57c)	Mainly used as solvent and chemical intermediate.
	Chromium trioxide	215-607-8	1333-82-0	Carcinogenic and mutagenic (articles 57 a and 57 b)	Used for metal finishing and as fixing agent in waterborne wood preservatives.
	Acids generated from chromium trioxide and their oligomers	231-801-5 236-881-5	7738-94-5 13530-68-2	Carcinogenic (article 57a)	These acids and their oligomers are generated when chromium trioxide is dissolved in water. Chromium trioxide is mainly used in form of aqueous solutions. Consequently, the uses of these substances are the same as indicated for chromium trioxide.

Solutions

HCT reminds enterprises, especially manufactures, importers and suppliers of these substances should understand and master new information requirements timely, Meanwhile, to reduce unnecessary trade losses, we should make sure products safety by enhancing quality control of original materials and seeking for safer alternative substances. HCT, possessing wide testing fields and convenient service channels, can help enterprises assess regulated specific chemical substances in products. Thus enterprises can successfully import products to designed target countries.

Details please click official link: ECHA SVHCs list
